

WELL COMPLETION & TESTING REPORT

SYNTHETIC DEMONSTRATION DOCUMENT - NOT REAL OPERATIONAL DATA (SIH PROTOTYPE)

WELL IDENTIFIER: NWIS-W001	OPERATIONAL DATE: 2021-11-15
FORMATION: Demo-Barail	MEASURED DEPTH: 3561.82 m
EVENT TYPE: NPT	SEVERITY LEVEL: LOW

FINAL WELL ARCHITECTURE

Target Reservoir: Demo-Barail Sandstone.
Final Drilled True Vertical Depth: 3561.82m TVD.
7-inch production liner set from 2650m to 3540m; cemented with Class G neat cement.

PERFORATION & TESTING

Perforated interval: 3012.0m to 3028.0m with 4-1/2 inch tubing-conveyed perforating (TCP) guns (6 SPF).
Initial reservoir pressure measured at 3820 psi. Flow tested through 24/64 inch adjustable choke.
Tubing Head Pressure: 1420 psi. Produced clean sweet crude oil at commercial rates.
Well handed over to production operations safely.
